PROFESSIONAL EXPERIENCE

ThirstyFish

Senior Software Engineer

Mumbai, India

Sept 2024 – Present

- Developed core features for **4Rooms**, a multi-tenant property management system utilizing **Laravel, CorePHP, MySQL, React.js, and React Bootstrap**, including modules for property management, room reservations, Channex integration, restaurant management, HRMS, shift management, and supply chain.
- Built the 4Rooms booking engine with **Stripe** integration, decoupling a **Next.js** and **Tailwind CSS** frontend from a headless **Laravel** CMS with **PostgreSQL** for optimized performance and scalability.
- Implemented location-based domain routing and dynamic, region-specific content delivery, including catalogs, blogs, and job postings, for **ABS Group** using Laravel.
- Delivered custom **Laravel** applications including an event ticketing system with Stripe and Xero integrations for **Legends Between Wickets**, a mock-test booking platform for **Arch Education**, and a time-slot-based food pre-ordering app for **BiryaniBowl**.
- Mentored junior engineers through code reviews and pair programming, while coordinating end-to-end releases across frontend and backend teams.

Full-Stack Developer

Mumbai, India

Oct 2023 – Aug 2024

- Worked across **Laravel, MySQL, Spring Boot, Node.js, and PostgreSQL** backends with **Next.js and Blade** on the frontend.
- Developed backend features for **Phroses**, an internal HRMS platform built on Spring Boot, with a **Next.js** and **Tailwind CSS** frontend.
- Led a custom Node.js web application, improving performance and long-term maintainability.
- Built an e-commerce platform in **Laravel** with Stripe integration.

ZedexInfo Pvt Ltd

Backend Developer

Mumbai, India

Dec 2022 – Sept 2023

- Responsible for backend development using **Laravel and MySQL**, with additional frontend contributions in **Next.js, Tailwind CSS, and Blade**.
- Built organization management features, improved resource search and filtering for **ResourceQueue**, and integrated the **Zoom API** to support in-platform interview scheduling.
- Developed a job portal and candidate application flow for **Mechanics Hub**, including Indeed API integration.

PROJECTS

Hortus API | github.com/sreejithnair190/hortus-backend

Built a production-grade **REST API** for a plant e-commerce platform in **Spring Boot** with **PostgreSQL** as the primary data store.

- Implemented **JWT** and **Spring Security** for authentication and authorization, with separate access and refresh token flows.
- Managed database schema migrations using **Flyway**.
- Integrated **Redis** for caching high-frequency endpoints and **RabbitMQ** for async event processing.
- Wired up **AWS S3** for product image uploads and containerized the full stack with **Docker Compose**.
